

FAQ

Which permission plugins are supported?

Currently, [LuckPerms](#), [UltraPermissions](#) and [BungeePerms](#) are supported. If you're using a different permissions plugin and would like to see it added to uQueue, make a ticket in the [support discord](#).

How do I only allow access to certain servers?

Change "ServerListMode" in config.yml to **whitelist**, and add the servers you want to allow without extra permissions. To allow players to visit servers that aren't whitelisted, give them the **uqueue.server.<server>** permission.

Where can I find official translations?

All official translations can be found [here](#). Currently official translations exist for Dutch and English.

Can't find your question?

Can't find your question on here? Ask it in the [support discord](#), we're here to help!
